Re: Smoking Article (HCN Filter)
Helf. 532-763 PM 576

Dear Howard:

The limitations in vapor pressure or molecular weight of the amine would not be harmful if they seem to be necessary to getting an allowance. I have discussed this with Dr. Rainer, and he is entirely in agreement.

If this does not result in favorable action, we should take an appeal in this case.

Sincerely,

G. Esler Inskeep
Assistant Patent Officer
